D/3 DCS® SERIAL KEYBOARD

Process Computer Technology (PCT) has developed a new Serial Keyboard for the D/3 DCS®. The Serial Keyboard is available as either a new keyboard (part number PCT710) or as a retrofit of an existing OCM II (retrofit part number PCT710U). PCT provides a one-year warranty on both the new and retrofit keyboards.

Both solutions include the new PCT Keyboard matrix with no outdated rubber overlays. And of course both solutions retain the familiar D/3 DCS® keyboard layout. Contact PCT or visit www.pct-inc.com to see how much you can save by retrofitting your OCM II.

We can also retrofit your OCM I, II or III rubber overlay keyboard with the new PCT replacement keyboard matrix. The refurbished keyboard you will receive is better than the original equipment. PCT provides a one-year warranty on the keyboard.
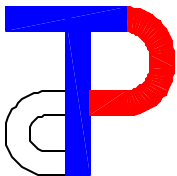

Process Computer Technology, Inc. (PCT) was founded in 1992, specializing in hardware services and support for the Texas Instruments, now Nova Tech Process Solutions, LLC, D/3® Distributed Control System.

PCT's support capabilities include total system on site maintenance, 24 hour telephone support, emergency parts exchange, new and refurbished add-on hardware, custom hardware design and manufacturing, and a proven track record of fast reliable depot repair services with a less than 1% failure rate.

In addition to a large stock of refurbished original D/3® parts PCT has designed it's own version of D/3® compatible products. PCT is dedicated to and proven capable of supporting the D/3 DCS® system and especially the 16000 I/O for as long as you have the system in service.

The D/3 DCS® 16000 I/O has been a flexible and reliable I/O system for many years. PCT has developed the GATEWAY 16000 as a solution for the migration of 16000 Series I/O and Modicon Quantum I/O to other Distributed Control Systems. We also purchase used D/3 DCS® equipment

Windows NT is a trademark of Microsoft, D/3 DCS® is a trademark of Nova Tech Process Solutions, LLC.; PCT is not affiliated with Microsoft or NPS. The GATEWAY 16000 and PCT710 Serial Keyboard are warranted solely by PCT. For more information call PCT or visit our web site at http://www.pct-inc.com
